

Standard

Ozone & Oxidative Therapy

A naturopathic doctor who is licensed by the Manitoba Naturopathic Association (MNA) may be certified to practice Ozone and Oxidative Therapies provided they have successfully completed the requirements outlined in this Standard.

- Ozone & Oxidative Therapies includes all therapies involving: ozone, hydrogen peroxide, intravenous (IV) ultraviolet therapy, and other invasive oxidative therapies.
- Certification in IV Therapy is required for those ozone and oxidative therapies that require IV administration.
- The administration of Prolozone requires certification in both **Ozone & Oxidative Therapies and Advanced Injection Therapies** (Part A and/or Part B).

Certification Requirements:

A registrant of the Manitoba Naturopathic Association may obtain certification to practice Ozone & Oxidative Therapies provided they have successfully completed all the following requirements for certification.

- Active member in good standing with the Manitoba Naturopathic Association
- Submit certification in IV Therapy and Emergency Medicine for IV Certification if the Naturopath is using IV applications of ozone/IV oxidative therapies).
- Possess a valid CPR-C (previously CPR – HCP) with AED certification (renewable every 2 years)
- Submit certification in *Advanced Injection Therapies* Part A/Part B **if practicing Prolozone.**
- Submit certification in Approved Ozone Therapy Course
- Possess \$3-million liability insurance coverage for all practice locations
- Maintain currency in [Continuing Education Requirements](#)
